

Sewer Lateral Process

Wesleyville Borough Property Owner,

Per Ordinance, prior to the sale of any property within the Borough of Wesleyville, the complete sewer system must be inspected and pass said inspection. The application for this inspection can be obtained at the Wesleyville Borough Office. The fee for the inspection process is \$180.00, which is due when the application is submitted, and includes up to two (2) inspections. Additional fees will be charged if more than two (2) inspections are needed. The cost to the Borough for the inspection process is \$170.00.

Once the application is submitted to the Borough, it is faxed to Building Inspection Underwriters of Pennsylvania Inc. (BIU) and Carlin Plumbing. To maintain consistency in the inspection process, the Borough has contracted and will only accept the findings from these companies. The inspector from BIU and Carlin Plumbing will contact you for an appointment to conduct the required inspection.

If the sewer system passes the initial inspection, a Certificate of Approval will be issued by BIU. Should there be a problem with the system, you will be advised of what the problems are causing the system to fail the inspection.

Should your system require repairs, it is your responsibility to obtain a plumber to perform said repairs. The Borough does not recommend any person or company to perform the repairs. Repairs must be completed within 90 days from the date of the inspection and prior to the sale of the property. We would always suggest that you obtain quotes from a number of companies that are capable of performing the work.

If repairs cannot be completed prior to the sale, sufficient funds may be held in escrow. To qualify for this exemption the Borough must receive: 1) An estimate for the cost of the repairs needed. 2) Letters from the attorneys handling the transaction as to the amount and where the monies are being held. 3) A letter from the attorney representing the buyer of the property stating that the new owner understands that the repairs must be made within 90 days of the closing and that he is now responsible for the repairs that are needed to bring the sewer into compliance.

Anyone performing the required repairs MUST contact the BIU inspector prior to starting the repairs. This is to insure that the inspections of the work done can be completed and that upon completion of the work the system will pass the final inspection.

Upon completion of the repairs, the BIU inspector and Carlin Plumbing will perform the final inspection of the system. When the system passes the inspection, BIU will issue a Certificate of Approval. The DVDs of the sewer inspections will be held at the Wesleyville Borough Code Enforcement office. Should you require a copy of the DVD, you may contact the office at 814-899-9124.

Thank you for your cooperation with this program.
